Education

Bachelor of Science in Computer Science, Cagayan State University – Carig Campus *Sept 2022 – Apr 2026*
DOST-SEI Undergraduate Scholarship Recipient, Department of Science and Technology *Sept 2022 – Apr 2026*

Experience

AI Response Evaluator for Python Task (Freelance), EBIT / Assemble (*Remote*) *Mar 2026 – Present*

- Completed **10+ software engineering evaluation tasks** in a remote **Python code review** project, comparing **20+ AI-generated responses** per task for correctness, execution quality, instruction adherence, and real-world applicability as if reviewing production pull requests.
- Produced structured, evidence-based comparative reviews across **9 evaluation dimensions** and **12 standardized weakness categories**, identifying issues such as verification failures, root-cause misses, instruction-following gaps, and false claims of success under time-limited workflows.

Commercial Technology Intern, Golden Suntec Solutions Inc. *Dec 2025 – Feb 2026*

- Participated in **agile ceremonies** including daily standups and postmortems, collaborating cross-functionally to prioritize sprint tasks, resolve blockers, and continuously improve team delivery processes.
- Executed functional testing and **QA validation on 30+ tickets** across Odoo ERP modules, tracked issues in a Jira-like system, identifying and documenting critical bugs that improved system reliability and reduced post-deployment issues.
- Configured and managed development environments using **Docker** containers and **Proxmox** virtual machines, enabling development and testing of custom Odoo modules for deployments.
- Executed **Git workflows** including trunk branching, pull and push operations, conflict resolution, and pull request merges to maintain code consistency in the main branch.
- Partnered with the **product marketing team**, leveraging **SIPOC analysis** and requirements-gathering techniques to map end-to-end feature workflows, translating technical functionalities into client-focused value propositions that strengthened sales demos.
- Configured Odoo Sales, Purchase, Inventory, Invoicing, and Help Desk modules, implementing 10+ automation rules, email templates, domain aliases, live chat, and chatbot to streamline client workflows and enhance operational efficiency.
- Contributed comprehensive system documentation, user guides, and implementation reports, improving client onboarding efficiency and reducing support inquiries.

Projects

Personal Portfolio | Next.js, TypeScript, Supabase, n8n *Jan 2026*

- Deployed my portfolio featuring a live AI chatbot with model fallback chain (LLaMA 3.3-70B → Qwen3-32B → LLaMA 3.1-8B), streaming responses, per-model cooldown caching, and multi-layer prompt injection defense.
- Implemented dual-layer content moderation for a public guestbook using regex blocklists and LLaMA Prompt Guard 2 for AI-based filtering to prevent spam and malicious content.
- Implemented backend safeguards including sliding-window rate limiting, strike-based IP banning, real-time GitHub stats integration, and a n8n workflow that forwards contact form submissions to Discord via webhook.

PawSense | Flutter, Firebase, Python, YOLOv8 *Aug 2025 – Nov 2025*

- Deployed a Flutter-based mobile app for detecting pet skin diseases using custom-trained YOLOv8 models on a dataset of 4,000+ annotated images covering 18 disease types.
- Trained and optimized two YOLOv8 models (0.37 mAP for dogs, 0.42 mAP for cats) and converted them to TensorFlow Lite for efficient on-device inference.
- Integrated Firebase for real-time data synchronization, user authentication, appointment booking, veterinary consultations, and implemented a feedback system for veterinarians to verify AI diagnoses and guide future model improvements.

Technical Skills

Programming Languages: Python, C#, Java, JavaScript, PHP
Frontend: Odoo, Flutter, React JS, React Native, Next JS, HTML, CSS, Tailwind CSS, Bootstrap, Material-UI, Shadcn
Backend: Node.js, Express.js, FastAPI, ASP.NET, Firebase, MongoDB, MySQL, PostgreSQL, Supabase
DevOps & Cloud: Docker, Proxmox, Google Cloud Platform, Firebase Hosting, Vercel, Render
Tools: Linux, Git, GitHub, n8n, Postman, VS Code, PyCharm, Figma, Expo

Certifications & Awards

Civil Service Examination – Professional Level, Civil Service Commission Philippines (Aug 2025)
Lean Six Sigma Yellow Belt, MF Treinamentos (Mar 2026)
Crash Course on Python, Google (Mar 2026)
Introduction to Cybersecurity, Cisco Networking Academy (Jan 2026)
Introduction to Modern AI, Cisco Networking Academy (Oct 2025)
